

Log of Boring No. BRC-SB-08-C

BMI Site - Hydrogeologic Characterization

Henderson, Nevada

Drilling Method: Sonic
Drilling Equipment: Rotary Sonic
Drilling Contractor: Resonant Sonic
Driller: ProSonic

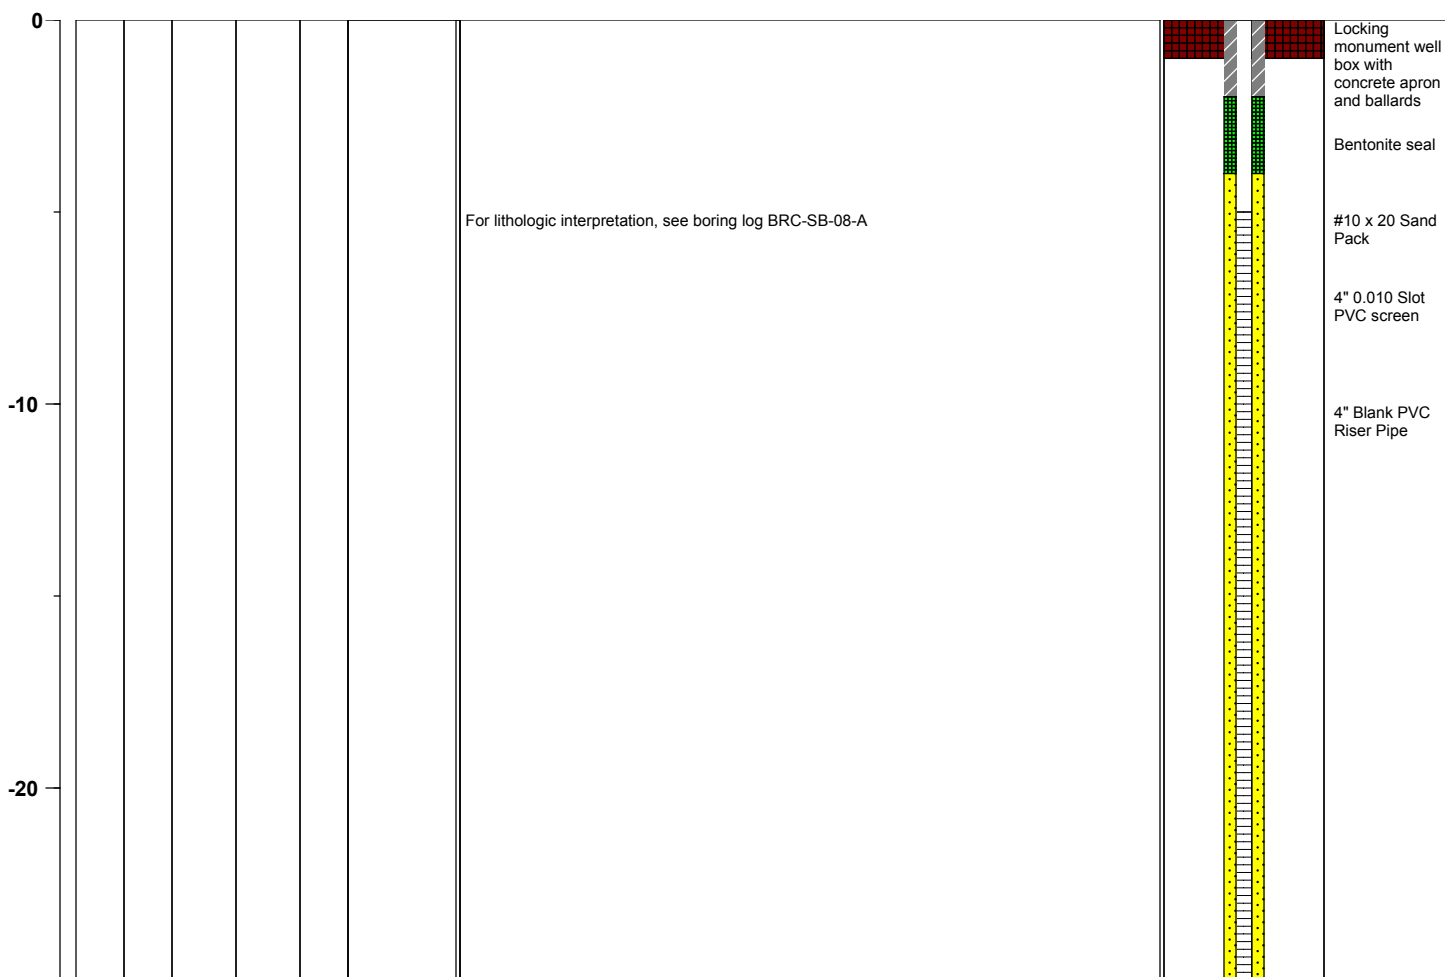

Borehole Total Depth: 37 ft bgs
Borehole Diameter: 8.5 in
Boring Location: Location 8 (Well ID: AA-08)
Depth to Water (ft. bgs): 9.5 ft bgs

Sample Type: N/A
Sample Interval: Cont. Core

Logged By: Tony Mikacich
Date Started: 05/23/04
Date Completed: 05/23/04

Monitoring Well Construction			
Type of Surface Seal:	Bentonite-Grout	Screen Slot Size:	0.010 in
Blank Casing Type/Size:	4" Sch 80 PVC	Top of Screen (ft. bgs):	5 ft bgs
Screen Type/Size:	4" Sch 80 PVC	Bottom of Screen (ft. bgs):	35 ft bgs
Transition Sand Type:	N/A	Type of Sand Pack:	2 x 12

Depth Elevation (MSLD)	Sample Type	Sample Interval	Sample Recovery (feet)	Sample Retained for Analysis	PID	Lithology	Soil Description	Well Construction
