

Log of Boring No. BRC-SB-06-C

BMI Site - Hydrogeologic Characterization

Henderson, Nevada

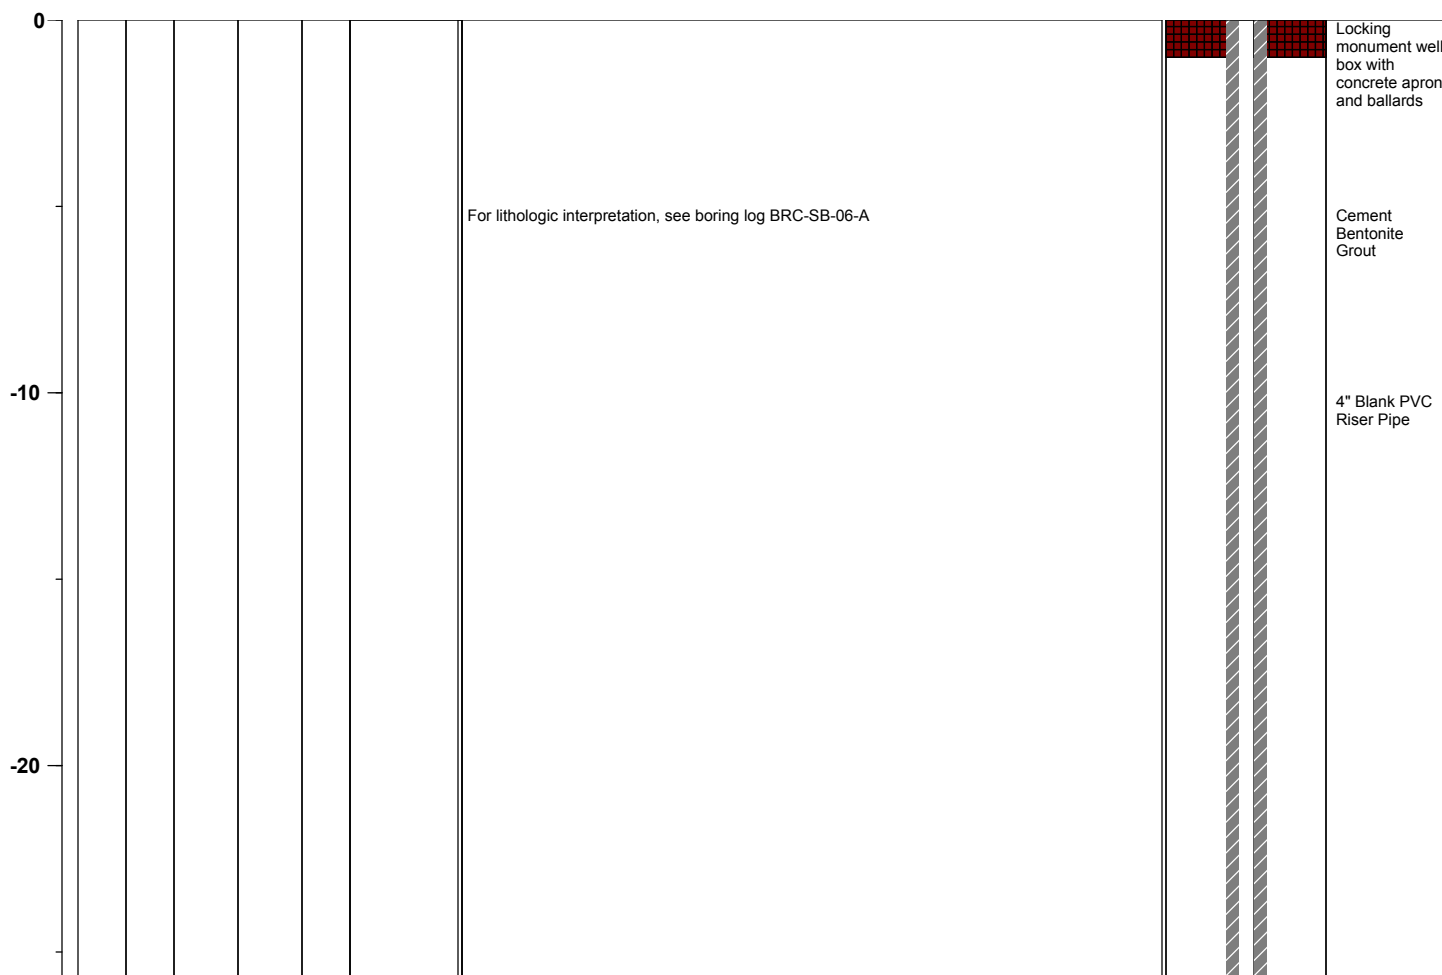

Drilling Method: Sonic
Drilling Equipment: Rotary Sonic
Drilling Contractor: Prosonic Corporation
Driller: ProSonic

Borehole Total Depth: 60 ft bgs
Borehole Diameter: 8.5 in
Boring Location: Location 6 (Well ID: MCF-06C)
Depth to Water (ft. bgs): NA

Sample Type: N/A
Sample Interval: N/A
Logged By: Tony Mikacich
Date Started: 07/12/04
Date Completed: 07/12/04

Monitoring Well Construction			
Type of Surface Seal:	Bentonite-Grout	Screen Slot Size:	0.010 in
Blank Casing Type/Size:	4" Sch 80 PVC	Top of Screen (ft. bgs):	44 ft bgs
Screen Type/Size:	4" Sch 80 PVC	Bottom of Screen (ft. bgs):	59 ft bgs
Transition Sand Type:	N/A	Type of Sand Pack:	2 x 12

Depth Elevation (MSLD)	Sample Type	Sample Interval	Sample Recovery (feet)	Sample Retained for Analysis	PID	Lithology	Soil Description	Well Construction
---------------------------	-------------	-----------------	---------------------------	---------------------------------	-----	-----------	------------------	-------------------

Project No. 3850360
