

QUARTERLY PROGRESS REPORT

AS REQUIRED BY

**SETTLEMENT AGREEMENT AND
ADMINISTRATIVE ORDER ON CONSENT
(AOC3)**

SECTION XIII, PARAGRAPHS 1 and 2.

SUBMITTED BY

BASIC REMEDIATION COMPANY

DATED JANUARY 15, 2010

I hereby certify that I am responsible for the services described in this document and for the preparation of this document. The services described in this document have been provided in a manner consistent with the current standards of the profession and to the best of my knowledge comply with all applicable federal, state and local statutes, regulations and ordinances. I hereby certify that all laboratory analytical data was generated by a laboratory certified by the NDEP for each constituent and media presented herein.

1/15/10

Dr. Ranajit Sahu, C.E.M. (No. EM-1699, Exp. 10/07/2010)

Date

BRC Project Manager

1. Introduction

This Quarterly Progress Report is being submitted to the Nevada Division of Environmental Protection (NDEP) pursuant to the requirements of Paragraphs 1 and 2 of Section XIII of the AOC3 executed between the Parties and NDEP on February 15, 2006. The format of this report is based on the requirements stated in Paragraph 1 of Section XIII. This report covers activities between October 1 and December 31, 2009.

2. Actions Taken Towards Achieving Compliance

In addition to the various documents submitted to the NDEP discussed below, BRC and NDEP held numerous meetings and telephone calls in order to achieve progress on project activities. In-person or telephone meetings were held between the BRC Project Manager and the NDEP Project Manager (occasionally along with representatives from the City of Henderson as well as consultants representing the prospective property buyer) roughly every two weeks. Minutes of these meetings are maintained separately. Additional issue-specific meetings were also held either in person or via telephone between BRC and NDEP Project Managers. Minutes of these meetings are also maintained separately.

Remediation activities continued during this quarter. Hauling of Eastside wastes to the CAMU commenced during this period. Daily progress reports are being submitted to the NDEP to document progress on these activities. Briefly: (i) BRC and its contractors continued to haul Eastside soils from the TIMET ponds and adjacent areas, including scrape soils after initial confirmation sampling, for their placement into the CAMU into Phases II, IIIB, IV and V; (ii) cover placement was initiated on Phases IIIA, and the slopes of Phases II, I, IIIB, and IV; (iii) final cover activities continued on BMI Landfills North and South; and (iv) associated air monitoring continued. Targeted air monitoring for baseline conditions across the plants, for the dry waste ponds, across the haul roads, and across the slit trenches, were completed and reports submitted to and approved by the NDEP. NDEP has been maintaining oversight of this effort directly and via its consultants.

Separately, BRC: (a) obtained approval of the Deep Soils Background report; (b) continued analysis of additional samples to determine an appropriate background for the Western Hook and Open Space areas with regards to arsenic; (c) completed data collection and analysis of the Eastside 2009 groundwater effort; (d) implemented the fourth of four quarterly groundwater monitoring events at the CAMU area; (e) obtained the final NFA for Parcel 4B; (f) submitted the risk assessment for the Mohawk sub-area; (g) conducted re-scrapes for the Western Hook, southern RIBs, Sunset North and Galleria sub-areas; (h) conducted initial confirmation sampling for the Open Space, First Eight Rows and Upper Ponds sub areas; (i) obtained NDEP-approval for the First Eight Rows and Spray Wheel sub area SAPs; (j) submitted the SAP for the TIMET sub area; (k) obtained approval for the workplan for side-by-side sampling for soil gas and vapor flux; (l) obtained approval for the indoor radon sampling; and (m) initiated development of the Integrated Background Report.

Results of previous confirmation sampling were received and analyzed and appropriate data validation activities also occurred.

BRC continued modeling efforts on solute groundwater modeling and began discussions on initial results with the NDEP.

BRC continues to participate in the coordinating “All Companies” conference calls. BRC and the companies await NDEP’s revision of the vapor intrusion report for the down gradient area.

3. Sampling Conducted

BRC collected various samples in support of the remediation effort including air monitoring samples for remediation support; iterative confirmation soil samples for various sub-areas; baseline groundwater samples from the CAMU area; and groundwater samples from various wells at the Eastside.

4. Work Plans and Other Deliverables Submitted Including Modifications

Attachment A shows a list of all documents that were submitted to NDEP in this period. Attachment B shows a list of all NDEP documents received during this period.

5. Actions Scheduled for Next Quarter

Activities planned include: completing the mass hauling of wastes from the Eastside; continuing waste hauling associated with confirmation scrapes; obtaining approval of the supplemental Western Hook/Open Space arsenic background dataset; obtaining NFAs for Mohawk, Southern RIBs and possibly the Sunset sub-areas; completion of data validation for various data sets; completion of Phase IIA air monitoring; initiation of any supplemental CAMU area groundwater monitoring as needed to complete the baseline data set; submittal of the final report on the Eastside 2009 groundwater monitoring; submittal of various groundwater reports including the Upgradient Report; the Isotope Report; and the CSM for the Eastside; completion of the side-by-side flux/soil gas report; completion of the radon study; and approval of the TIMET Ponds and Staging sub area SAPs.

The following Work Plans and Other Deliverables are planned to be submitted to the NDEP in the next period:

- (i) Revised Project Schedule (updated as needed). The current construction schedule is attached to this report. A regular overall project schedule is also attached.
- (ii) Various Data Validation Summary Reports, as needed.

(iii) Final NFA-support risk assessment reports for Mohawk, Southern RIBs, Sunset North.

(iv) Supplemental Arsenic background report and the Integrated Background Report.

(v) Draft SAP for the Staging sub area

(vi) Final SAP for the TIMET sub area

(vii) Updated Eastside CSM

(viii) Various targeted scrape plans for the different sub-areas, as needed.

Additional documents may also be submitted depending on project progress.

6. Completions, Delays and Mitigations

The remediation effort is generally on schedule. Additional waste materials were discovered at the CAMU (various), the First Eight Rows sub-area, and the TIMET Ponds sub-area.

7. Planned Modifications to Remedial Actions

Not applicable at this time. BRC is investigating the possibility of accepting certain BMI plant wastes into the CAMU assuming excess capacity in the CAMU. A public notice for the action was issued and no comments were received. Discussions regarding this matter continue between BRC and AIG (Chartis), as well as the prospective sources, including Syngenta, TIMET, and Tronox.

8. Community Relations Plan Actions Taken

The project website was operational as of late November 2006. Parts of the website will continue to be modified as needed. NDEP agreed with BRC that: (a) the kiosk can be demobilized as far as remediation activities are concerned; and (b) the frequency for the RAC meetings can be reduced in 2010, consistent with desires of the RAC members. Per agreement with the RAC, the frequency has been reduced to approximately twice annually.

A Restoration Advisory Committee (RAC) meeting was held on January 7, 2009.

9. Community Relations Plan Actions for Next Quarter

The project website is expected to be updated periodically, including a reorganization of how the various documents are organized, to facilitate ease of retrieval.

Appendix A - Documents Submitted To NDEP

TO	FROM	DATE	SUBJECT
Brian Rakvica	Geosyntec on behalf of Ron Sahu	10/2/2009	Response to Comments dated 8/29/09, Final Leachate Monitoring Plan
